

State of Alaska FY2008 Governor's Operating Budget

Department of Natural Resources Alaska Coastal Management Program Component Budget Summary

Component: Alaska Coastal Management Program

Contribution to Department's Mission

Oversee responsible development of coastal uses and resources within the State's coastal area and the Outer Continental Shelf (OCS).

Core Services

Manage and administer the Alaska Coastal Management Program (ACMP).

Act as State's liaison to federal agencies (1) conducting/permitting activities within the State's coastal area and the Outer Continental Shelf; (2) involving federal laws/initiatives that effect development of the coastal uses or resources of the State.

Manage and administer the Coastal Impact Assistance Program (CIAP).

End Results	Strategies to Achieve Results
<p>A: Promote responsible resource development.</p> <p><u>Target #1:</u> Review all resource development projects received for compliance with ACMP requirements.</p> <p><u>Measure #1:</u> Percentage of projects that comply.</p>	<p>A1: Effective delivery of project management and review services.</p> <p><u>Target #1:</u> Approve 28 coastal district plan revisions by March 1, 2007. SB 102 extended the approval date for coastal district plan revisions to March 1, 2007.</p> <p><u>Measure #1:</u> Number of approved coastal district plan revisions by March 1, 2007.</p> <p><u>Target #2:</u> Achieve 95% project compliance as measured by the percentage of total projects reviewed and found consistent.</p> <p><u>Measure #2:</u> Percentage of projects found consistent compared to projects found inconsistent. Consistent projects include consistent as proposed, consistent with conditions, those determined to have no coastal effects and projects receiving expedited approvals.</p> <p>A2: Efficient delivery of project management and review services.</p> <p><u>Target #1:</u> 50-day average consistency review timeframe for individual consistency reviews.</p> <p><u>Measure #1:</u> Average number of days to complete consistency review.</p> <p>A3: Ensure the State's coastal interests are reflected and protected.</p> <p><u>Target #1:</u> 100% of initiatives affecting the State's coastal zone, uses, and resources are tracked, reviewed, and commented on.</p> <p><u>Measure #1:</u> Percentage of initiatives tracked, reviewed and commented on.</p>

Major Activities to Advance Strategies

- Manage annual federal grant & state funds for implementation of the Alaska Coastal Management Program (ACMP)
- Manage one-time federal grant for the Coastal Impact Assistance Program (CIAP)
- Coordinate & conduct consistency review of federal agency activities & state/federal permitted activities in the coastal zone
- Assist local coastal districts in developing & implementing district plans to further manage local coastal uses & resources
- Provide support and/or educational materials to local, state, & federal agencies, industry & public to address issues affecting coastal management
- Review & respond to proposed initiatives (federal & other) that affect Alaska's coastal management & related jurisdictional issues

FY2008 Resources Allocated to Achieve Results

FY2008 Component Budget: \$4,441,800

Personnel:

Full time	32
Part time	0
Total	32

Performance Measure Detail

A: Result - Promote responsible resource development.

Target #1: Review all resource development projects received for compliance with ACMP requirements.

Measure #1: Percentage of projects that comply.

Projects Reviewed by ACMP by Fiscal Year

Analysis of results and challenges: 97% of all projects are compliant with the ACMP laws. The above percentage reflects projects that were compliant as proposed by the applicant, as well as projects that were modified by alternative measures that were needed to bring the projects into compliance. This percentage is an indication of our success in protecting coastal uses and resources while promoting resource development activities.

The graph also illustrates the number of individual project's OPMP reviews for consistency with the ACMP. As demonstrated, there is a steady decrease in individual consistency reviews conducted by OPMP. While it may indicate there is a decrease in resource development activities, it is more likely a result that OPMP is processing more projects in a streamlined fashion under the List of Expedited Consistency Review and State Authorizations Subject to the ACMP (ABC List). Streamlined consistency reviews and greater use of the ABC List allows OPMP staff to spend more time on the more complex and controversial projects. Trend-wise, this data indicates that OPMP continues to consistently achieve a high level of coastal use and resource protection, even during significant program change and a refocusing of the workload.

A1: Strategy - Effective delivery of project management and review services.

Target #1: Approve 28 coastal district plan revisions by March 1, 2007. SB 102 extended the approval date for coastal district plan revisions to March 1, 2007.

Measure #1: Number of approved coastal district plan revisions by March 1, 2007.

Analysis of results and challenges: To date, OPMP has completed the review and approval process for 14 of the 28 coastal districts. The remaining 14 coastal district plan revisions are in various stages of review and

approval by DNR, some of which remains out of OPMP's control (i.e., further coastal district plan revisions achieved and resubmitted by the coastal districts).

Target #2: Achieve 95% project compliance as measured by the percentage of total projects reviewed and found consistent.

Measure #2: Percentage of projects found consistent compared to projects found inconsistent. Consistent projects include consistent as proposed, consistent with conditions, those determined to have no coastal effects and projects receiving expedited approvals.

Percentage of Projects found Consistent versus Inconsistent (Thru 6/30/06)

Year	Consistent	Inconsistent	Withdrawn	YTD Total
2004	98%	0%	2%	100%
2005	99%	0.5%	0.5%	100%
2006	97%	1%	2%	100%

A2: Strategy - Efficient delivery of project management and review services.

Target #1: 50-day average consistency review timeframe for individual consistency reviews.

Measure #1: Average number of days to complete consistency review.

Average Length of Project Review in Calendar Days (Thru 6/30/06)

Year	Expected	Actual	YTD Total
2004	50 Days	59.4 Days	59.4 Days
2005	50 Days	49.1 Days	49.1 Days
2006	50 Days	49.5 Days	49.5 Days

Analysis of results and challenges: During the FY04 reporting period, the ACMP program experienced a 30-50% vacancy factor as a result of a number of program changes. The vacancies affected the ability of the remaining staff to complete some projects within the targeted timeframe.

During the FY05 and FY06 reporting period, vacancies and staff turn over due to the uncertain nature of the program approval process continued to be a factor in reviewing projects within the designated time period. In spite of continued program uncertainty, additional program changes, and a 37% vacancy factor, existing staff met and exceeded the targeted consistency review timeframe in FY05 and FY06.

A3: Strategy - Ensure the State's coastal interests are reflected and protected.

Target #1: 100% of initiatives affecting the State's coastal zone, uses, and resources are tracked, reviewed, and commented on.

Measure #1: Percentage of initiatives tracked, reviewed and commented on.

Analysis of results and challenges: OPMP continues to track 100% of the initiatives affecting the State's coastal zone, uses, and resources. OPMP accomplishes this target through working directly with the various federal agencies operating in Alaska (BLM, MMS, NOAA, USFS, USFWS, EPA, USACOE, FAA, etc.), tracking their initiatives to be implemented in Alaska, and commenting when appropriate.

One of the primary initiative facing Alaska's coastal zone uses and resources is the recent report, U.S. Commission on Ocean Policy final version "An Ocean Blueprint for the 21st Century." In response to the nationally proposed directives affecting Alaska, ACMP program managers are coordinating with other state agencies to develop alternate policy strategies.

Key Component Challenges

In FY 2004, the Office of Project Management and Permitting revised the ACMP regulations at 6 AAC 50 (now 11 AAC 110), 6 AAC 80 (now 11 AAC 112), and 6 AAC 85 (now 11 AAC 114), as mandated by the legislative changes in House

Bill (HB) 191 (chapter 24 SLA 2003). As a networked program, the ACMP faced a difficult task in providing timely and effective education and training to all of the program participants.

In addition, the statutory changes made in FY 2003 resulting from Executive Order 106, HB 69 (chapter 45 SLA 2003), HB 86 (chapter 81 SLA 2003), and HB 191 (chapter 24 SLA 2003), as well as the regulatory revisions contained at 11 AAC 110, 11 AAC 112, and 11 AAC 114 were submitted to NOAA/OCRM for review and approval as an amendment to the approved ACMP. The federal approval process proved to be very challenging, with the ACMP facing intense scrutiny from OCRM and other participants as the program and changes were reviewed and approved. In addition, significant scrutiny continues as the changes are implemented.

As part of the same legislative mandate in HB 191, all approved coastal district plans and areas meriting special attention were required to be amended and submitted by March 1, 2006 per SB 102 for DNR review and approval, or they sunset on March 1, 2007. Of the 33 coastal districts, 28 developed amendments to their coastal district plans. Of the 28, 14 have been reviewed and approved by DNR, and have been submitted to OCRM for federal review and approval. Each of these coastal district plan amendments must be completed and effective (including DNR review and approval, OCRM review and approval, and filing with the Lt. Governor's Office) by March 1, 2007, or the existing district plan sunsets.

The current database the Office of Project Management and Permitting uses to track ACMP project consistency reviews and grants to agencies and coastal districts, and to store information on district plans and policies is inadequate. Connection speeds are slow and information is difficult to extract, making it hard to provide accurate and timely information to agencies and the public. The Office of Project Management and Permitting has begun development of a new database application that will support an integrated information system including the web, a geographic information system, and a document management system.

Significant Changes in Results to be Delivered in FY2008

Executive Order 106 (effective April 15, 2003), legislative changes contained in House Bills (HB) 69 (chapter 45 SLA 2003, effective June 6, 2003), HB 86 (chapter 81 SLA 2003, effective June 12, 2003), and HB 191 (chapter 24 SLA 2003, effective May 21, 2003) have modified the goals, strategies, and required services to implement the ACMP. The Office of Project Management and Permitting is working to ensure the level of service is maintained after the programmatic changes to the ACMP.

The revised ACMP statutes, regulations, coastal district plans, and List of Expedited Consistency Reviews will provide resource developers, permit reviewers, and ACMP participants with more predictable consistency reviews and streamlined permitting processes.

Major Component Accomplishments in 2006

1. Continue to establish the Office of Project Management and Permitting. This office leads and coordinates all matters relating to the state's review and authorization of resource development projects, and administers and implements the ACMP. The purpose of the office is to facilitate and expedite resource development by coordinating and streamlining the permitting activities of all state agencies with authority over a project.
2. Secured federal approval of statutory and regulatory changes to ACMP.
3. Coordinated or expedited approximately 350 consistency reviews for resource development projects within the coastal zone.
4. Provided coordinated and consolidated State response on all National Oceanic and Atmospheric Administration, Office of Ocean and Coastal Resource Management proposed rules, regulations, and initiatives.
5. Worked with Minerals Management Service, Forest Service, U.S. Army Corps of Engineers, and the Departments of Environmental Conservation and Transportation and Public Facilities to identify coastal consistency issues that would be resolved through the application of MOU's or other effective coordination and cooperation means.
6. Coordinated the development of ranking criteria for water bodies in Alaska that would be prioritized for funding and actions for stewardship, monitoring, data collection, or recovery. Assisted in the design and implementation of the first Alaska Clean Water Action joint request for proposal.

7. Completed a user needs analysis and software requirement specifications for a new information system that accommodates ACMP needs with DNR's needs. Secured significant federal funding to build the system in conjunction with DNR/DMLW.
